EDUCATION

CORNELL UNIVERSITY ● ***GPA: 3.64*** **Ithaca, NY**

Candidate for Bachelor of Arts in Computer Science, Minor Psychology *Expected Dec 2028*

Relevant Coursework: OOP*;* Data Structures; Discrete Math; Linear Algebra; Functional Programming; Computer Systems; Database Systems; AI Chatbots, RAG, & AI Agents; Data Science Consulting

Other Campus Involvements: Chinese Student Association, CU Tonight

SKILLS

LANGUAGES: Java, Python, OCaml, C#, SQL, C/C++, Javascript, HTML/CSS, Mandarin (Fluent), Spanish (Limited)
TECHNOLOGIES: GitHub, Unity, Pandas, NumPy, scikit-learn, Matplotlib, Jupyter Notebook, Docker, AppScript, JUnit

EXPERIENCE

ACCENTURE **Ithaca, NY (Remote)**

AI Studio Fellow *Aug 2026 – Present*

- Building a contract review tool in a team of 7 with an Accenture engineer using PyTorch to flag risky clauses based on severity
- Developing a multi-label transformer NLP pipeline to classify 41 clause types across 510 CUAD contracts and 13,823 spans
- Designing an explainable risk-scoring system to prioritize contracts, evaluated with precision, recall, F1, and ranking metrics

DGA STUDIOS PROJECT TEAM **Ithaca, NY**

Programmer *May 2026 – Present*

- Prototyped Veil-Sur, puzzle stealth game where players photograph clues & escape mutants; chosen for year-long development
- Contributing 9+ hours/week to team's codebase through sprints, code reviews, debugging, feature development, and team standups
- Implemented dialogue manager, tutorial tooltips, error messages, and gameplay UI in C# using reusable Unity components

CORNELL UNIVERSITY EXTENDED REALITY PROJECT TEAM (CUXR) **Ithaca, NY**

Software Team Member *Nov 2025 - Present*

- Created interactive 3D environments in Unity and C# for a VR system integrating real-time olfactory feedback hardware
- Programming persistent-memory application for smart glasses, using FastAPI & ML-based face/speech recognition to recall people

CORNELL DUFFIELD COLLEGE OF ENGINEERING **Ithaca, NY**

Project Teams Application Developer *Oct 2026 - Present*

- Maintaining and extending Cornell's Project Teams Ops Hub, an incident-reporting platform used by all project teams (JS, AppsScript)
- Auditing 36 Cornell Project Team websites and designed a Python scraper and Google Sheets directory with team and lead filters

YOUNG ADULT INSTITUTE **New York City, NY**

Assistive Technology Intern *Jun 2026 – Aug 2026*

- Built a route-planning website with Google Maps API to support travel training on public transport for individuals with IDD
- Integrated NYC Open Data datasets covering accessible pedestrian signals, raised crosswalks, and accessibility infrastructure

PROJECTS

BRACKET CITY (OCaml, Dune, Dream, HTML/CSS, JS, OUnit)

- Recreated the Atlantic's Bracket City with a HTML/CSS/JavaScript frontend, an OCaml backend, WebSockets, and Dream
- Implemented real-time gameplay features including user interactions, countdown timers, input validation, and adjusted difficulty
- Designed data structures to represent parsed puzzles and wrote OUnit unit tests to check correctness, achieving 90% code coverage

BREWHAHA (C#, Unity) – DGA Fall Game Jam: First Place

- Architected puzzle mechanics and core systems, created all art, delivered a complete build in 7 hours with AI-assisted development

INTERESTS

WOMEN IN COMPUTING AT CORNELL (WICC) **Ithaca, NY**

Social Director *Aug 2026 - Present*

- Planning 50+ attendee events, including club kickoff, Gbody and Eboard socials, and off-campus outings to strengthen community
- Managing $1K+ event budgets, programming, logistics, and coordinating with executive board members and external organizations

DESIGN + AUGMENTED INTELLIGENCE LAB (DAIL) **Ithaca, NY**

Research Assistant *Aug 2026 - Present*

- Designing a pipeline to automate research assistant onboarding including a search tool to filter by skill and availability to staff projects
- Present literature reviews on environmental psychology to lab of 30 members, summarizing methods, findings and limitations

OTHERS: Crochet, Video games, Baking, Cats, Fishing, Brooklyn Nine-Nine
